

NANOKERATIN SYSTEM®
HAIR SPA KERATIN

- o Intense reconstruction of hair strands through keratin
- o Repairs fissures in hair strands after coloring and highlighting
- o Completely repairs hair

Coats hair with **keratin**, renews hair and gives it a shiny, flexible look

Nanokeratin System Hair Spa Keratin is a preparation based on state-of-the-art nanotechnology which quickly builds and replenishes keratin in the hair.

Nanokeratin System Hair Spa Keratin, together with a highly concentrated protein compound, has a unique patented formula that acts fast and vigorously to regenerate and rebuild the hair shaft. The use of this unique formula will bring back the natural strength and shine that the hair loses over the years and because of chemicals treatments, sun light and pollution. This formula has been especially designed to regenerate the keratin that the hair loses every day.

WHAT IS **Nanokeratin System Hair Spa Keratin**?

The **Nanokeratin System Hair Spa Keratin** is an innovative development at the forefront of technology that utilizes nano-molecular keratin, whose particles are so miniscule that millions of them can be gathered onto a pin head! Minute traces of vapor with extraordinary penetration capabilities enter and completely fill damaged hair with nano-molecular keratin particles. During the next step those nano-molecules are locked into the hair as additional vapor is infused, thus creating permanent, non-soluble keratin, just like natural keratin!

The result is beautiful, silky soft, nourished hair with a glorious shine. Hair immediately becomes healthier and easier to style. The **Nanokeratin System Hair Spa Keratin** revitalizes hair. It's as simple as that!

WHY **Nanokeratin System Hair Spa Keratin**?

Hair consists mainly of protein (92% protein or keratin). Lipids (fats) and water. As depicted below, a strand of hair consists of 4 layers: the outermost layer, the cuticle, and the inner layers: the cortex, the cell membrane complex and the medulla.

Studies have shown that most, if not all, conditioning treatments on the market today only treat the outer cuticle layer. This is understandable - it is the easiest to reach. However, it is the

inner cortex that constitutes on the major portion of fibers and proteins which give the hair stability and strength. In the past, this inner layer was difficult to treat because the overlapping cuticle cells blocked the penetration of nutrients found in traditional products.

Hair loss protein (keratin) over time due to pollution, exposure to sunlight, chemical processing and strengthen the hair , it is necessary to treat the inner cortex and replace the lost protein (keratin). Current treatments benefit the outer, cuticle layer: a temporary fix for a deeper problem.

ABOUT THE ACTIVE INGREDIENT

The active ingredient in **Nanokeratin System Hair Spa Keratin** is a purified protein isolated. **Nanokeratin System Hair Spa Keratin** is small protein **Nan**-molecules effectively penetrate through the cuticle layer and replenish the cortex with protein, giving the hair a wonderful, long lasting silky feeling and an amazing shine. This is why **Nanokeratin System Hair Spa Keratin** is not comparable to any other hair treatment.

Lab researchers have found that **Nanokeratin System Hair Spa Keratin** rejuvenates and rebuilds the hair like on other conditioning or so-called deep conditioning treatment.

SUGGESTED DOSES

after shampooing with **Nanokeratin** hair Shampoo.

Once or twice carefully dry and then massage **Nanokeratin System Hair Spa Keratin** contents of applicator bottle into hair gently comb through. Wait ten minutes before blow-drying / **Titanium** Straightening Iron.

Take the enclosed applicator bottle and fill 0.5-1.3 oz. **Hot water** and contents for the 3-9 ml **Nanokeratin System Hair Spa Keratin** the applicator bottle and shake.

short hair

0.5 oz. **hot water** and the whole vial apply as stated above

3ml- **Nanokeratin System Hair Spa Keratin**

medium length hair

2 oz. **hot water** and the whole vial apply as stated above

6ml- **Nanokeratin System Hair Spa Keratin**

long hair

1.3 oz. **hot water** and the whole vial apply once a week for five weeks then maintenance is once or twice a month.

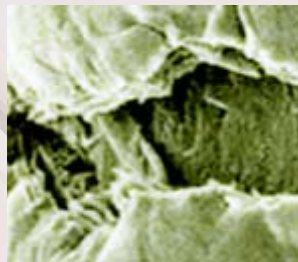

9ml- **Nanokeratin System Hair Spa Keratin**

Very damaged hair

Follow directions above

Repeat treatment 3 times per week for 2 months.
