

NANOKERATIN SYSTEM®
BRAZILIAN KERATIN TREATMENT

NANOKERATIN SYSTEM®

NOURISHING RESULTS FOR CLIENTS!

Keeping one's hair healthy is one of the challenges faced by the modern woman.

We are constantly surrounded by elements that are harmful to our hair, thus it is important to treat hair periodically to ensure it remains strong, soft and shiny.

Introducing the Nanokeratin System – the hair straightening and repair system.

Leading chemists at “Nanokeratin” were the first to develop the Nanokeratin technology, a breakthrough in the field of hair straightening and repair.

The system utilizes nano-molecular keratin, whose particles are so miniscule that millions of them can be gathered onto a pin head. The Nanokeratin particles are deposited and locked deep within the damaged hair, enveloping it within a permanent non-soluble coating, precisely mimicking natural keratin.

The result is smooth, shiny, silky hair. The Nanokeratin treatment renews your hair and helps it withstand humidity.

The Innovative straightening method that your clients will love!

“Nanokeratin System” is a revolutionary technology in the field of hair straightening which is based on nano-molecules of keratin – your hair's natural building material. The particles meld perfectly into the structure of your hair and provide it with a softer, smoother and silkier look than ever before. You can now offer your clients the most advanced, efficient and healthy straightening method and smooth your way to success...

-  A revolutionary breakthrough in the field of hair straightening
-  Greatly successful with damaged, lightened, blond and highlighted hair as well
-  Straightening that repairs and nurtures your hair
